Summary

I am a frontend web developer with 4+ years of experience building complex applications from scratch for startups. I have strong skills in HTML, CSS, JavaScript, and frameworks like ReactJS, VueJS, and TypeScript. I have enjoyed working on projects like landing page builders, conference management tools, and museum management systems. My experience as a frontend web developer has been very rewarding and has allowed me to grow both personally and professionally.

Experience

Frontend Developer
Softronet Inc

Jan 2022 - Present (1 year)

Working at a consultancy firm has been a challenging and rewarding experience for me. I have had the opportunity to work on a variety of complex projects, including a landing page builder, a conference management tool, and a museum management tool.

I mainly used ReactJS and TypeScript to build these applications, but I also had the opportunity to work with other JavaScript frameworks such as VueJS when needed.

One of the main goals of the projects was to build scalable applications that could handle and serve a large number of customers throughout the globe. This required a lot of attention to detail and careful planning to ensure that the applications were able to meet the needs of our clients.

Senior Frontend Developer
Upwork

Mar 2020 - Present (2 years 10 months)

As a highly skilled developer, I have had the opportunity to work on a startup project that has been extremely successful on Upwork. Through my dedication and expertise in ReactJS and VueJS, we were able to achieve the top rated plus badge on the platform and earn over $100,000 in revenue. My ability to adapt to new technologies and consistently deliver high quality work has been integral in the success of this project. I am extremely proud of the achievements we have made and look forward to continuing to grow and succeed in the future.

Senior ReactJS Developer
DealIntelligence

Nov 2020 - Dec 2021 (1 year 2 months)

Junior ReactJS Developer
Dealintelligence

Jan 2020 - Oct 2020 (10 months)

Working at a B2B startup has been a great experience for me. I was hired as a junior developer and was responsible for building a prototype for a sales lead generation tool using ReactJS and TypeScript. Over the course of the year, I was able to scale it up to meet the needs of our customers and was promoted to a senior developer because of my hard work and dedication to the project. I have gained valuable skills in web development and have had the opportunity to work with a talented and dedicated team. The sales lead generation tool has been instrumental in helping us acquire new customers and drive growth. Overall, it has been a great learning experience and has allowed me to grow both personally and professionally.

Frontend Developer
Relion

May 2019 - Dec 2019 (8 months)
Working at a startup that provides visual charts using analytical data has been challenging and rewarding. I have had the opportunity to work with a variety of technologies, including ReactJS, and have enjoyed the flexibility and performance it offers. The fast-paced environment has provided many opportunities for growth.
